Performance Drug List

The Caremark Performance Drug List is a guide within select therapeutic categories for clients and their plan participants. Generics should be considered the first line of prescribing. If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only and not meant to be all-inclusive. This list represents brand products in CAPS and generic products in lowercase italics.

Your specific prescription benefit plan design may not cover certain categories, regardless of their appearance in this document. For specific information, visit our Web site at www.caremark.com or contact a Caremark Customer Care representative.
To check coverage and copayments for a specific medicine, you can refer to the Caremark Drug List. This list is meant to be all-inclusive. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use for which the product is indicated.

This list represents brand products in CAPS and generic products in lowercase. Italicics indicate the proposed mechanism of action, based on the American Psychiatric Association Summary of Treatment Recommendations. Generics should be considered the first line of prescribing. This Caremark Drug List is not inclusive nor does it guarantee coverage, but represents a summary of prescription coverage. Specific prescription benefit plan design may not cover certain categories, regardless of their appearance in this document. The plan participant's prescription benefit plan may have a different copay for specific products on the list. Unless otherwise indicated, drug list products will include all dosage forms.

FOR YOUR INFORMATION:
