Performance Drug List

The Caremark Performance Drug List is a guide within select therapeutic categories for clients and their plan participants. Generics should be considered the first line of prescribing. If there is no generic available, there may be more than one brand name medicine to treat a condition. These preferred brand name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only and not meant to be all-inclusive. This list represents brand products in CAPS and generic products in lower case italics.

### PLAN PARTICIPANT

Your benefit plan provides you with a prescription benefit program administered by Caremark. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

**Please note:**
- Your specific prescription benefit plan design may not cover certain categories, regardless of their appearance in this document.
- For specific information regarding your prescription benefit coverage and co-pay1 information, please visit our Web site at [www.caremark.com](http://www.caremark.com) or contact a Caremark Customer Care representative.
- Caremark may contact your doctor after receiving your prescription to request consideration of a drug list product or generic equivalent. This represents a summary of prescription coverage.
- The plan participant’s specific prescription benefit plan may have a different co-pay1 for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Log in to [www.caremark.com](http://www.caremark.com) to check coverage and co-payments for a specific medicine.

### HEALTHCARE PROVIDER

Your patient is covered under a prescription benefit plan administered by Caremark. As a way to help manage healthcare costs, authorize generic substitution whenever possible. If you believe a brand name product is necessary, consider prescribing a brand name on this list.

**Please note:**
- Generics should be considered the first line of prescribing.
- This drug list is not inclusive nor does it guarantee coverage, but represents a summary of prescription coverage.
- The plan participant’s specific prescription benefit plan may have a different co-pay1 for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Generics should be considered the first line of prescribing.
